Cyber Awareness Training for  
Australian Medical Clinics

# THREATIQ

Help your team identify, report, and avoid dangerous emails before they cause harm — with zero stress or setup required.

## FEATURES

### Train Your Staff to Outsmart Cyber Threats

#### **RACGP & ACSC-ALIGNED TRAINING**

ThreatIQ is built around the real risks facing Australian medical professionals, and supports compliance with RACGP accreditation and ACSC security guidelines.

#### **ONGOING PHISHING SIMULATIONS**

We safely test your team using realistic (but harmless) phishing emails, so they learn to spot red flags in real-world scenarios.

#### **ROLE-BASED LEARNING**

Admin, reception, doctors, and management staff all receive training tailored to their specific day-to-day risks.

#### **BITE-SIZED TRAINING MODULES**

Each lesson takes just minutes to complete — perfect for busy clinic schedules.

#### **AUSTRALIAN-FOCUSED CONTENT**

Training includes real-world Australian case studies, examples of scams targeting local practices, and up-to-date threat trends.

### Visibility & Accountability Built In

#### **CLINIC DASHBOARD**

See who's completed training, who needs support, and which staff are struggling to detect phishing emails.

#### **COMPLIANCE REPORTING**

Instantly download training and simulation records for audits, cyber insurance renewals, or RACGP reviews.

#### **AUTOMATIC REMINDERS**

ThreatIQ keeps things on track by sending simple reminders to staff who fall behind.

## Prevent Human Error from Becoming a Breach

Most clinic breaches and ransomware attacks start with a single click on a phishing email.

ThreatIQ reduces that risk by turning your people into your best defence — without the need for technical knowledge or extra admin.
